## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of adduct disclosed at pages 21-22 (Example 7) in the reply filed on June 04, 2004 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 30-32, 34 and 36 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Scollard et al., Macromolecules, Vol. 29, pp. 5241-5243 (1996). Scollard et al. discloses a reaction scheme (see page 5241) in which silylated diamines are reacted with titanium tetrachloride using xylenes under reflux conditions to form a chelated diamine titanium dichloride complex. On a second step, the chelated diamine titanium dichloride complex is reacted with a Grignard reagent to form the final product. This process scheme clearly anticipates claim 30-32. Furthermore, the first step of the above reaction scheme also anticipates claims 34 and 36.

### ***Allowable Subject Matter***

4. Claims 33 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. It is noted that the elected adduct is novel.
